Treasurer's report

Report of subcommittees:

- Executive
- Business and Industry
- Health
- Training
- Planning

9:30 a.m. Educational Sessions

HMEP Grant Project Update

In early 2022, the Mystic REPC was awarded an HMEP Grant to conduct a Commodity Flow Study for the member communities. This study will identify the locations of

extremely hazardous substances and the transportation routes used to transport these materials throughout the Mystic REPC region. Stefan Coutoulakis and Michael Castro will provide an update on the status of this project and next steps.

#### Are Bio Labs Seeking To Open in Your Community? Now What?

Recently, there has been a significant increase in the number of bio and other life science laboratories applying for permission to open in the region. Have any applied or opened in your community? How does your community process these applications in terms of permits, licenses, zoning, and regulations? This session will include representatives from local communities who will discuss the processes in place in their cities and towns and provide some ideas on how this topic may be approached if you do not have a Bio Committee, or wish to take advantage of lessons learned in other communities to improve or change your current process. Michael Castro will moderate this session.

12:00 p.m.
