In attendance: Carmen Jaquier, Evan Ricker, Nina Nickles, Cheryl Baggen

Meeting called to order 7:35
Minutes of 1/30/19 approved.

Discussion of the May 18th Cooler Concord Sustainable Landscaping Fair, being run by CSEC (Concord Sustainable Energy Committee). WPAC will have a table at the event. Cheryl will be at the table from 10am until Noon. Relevant pamphlets, a map of White Pond and its watershed will be available at the table.

Carmen noted that she had been informed by NRC that the erosion control and restoration previously approved by the Town was expected to start in early summer.

Discussion of the NRC’s decision to have the conservation land associated with the land gifted to the Town by White Pond Associates (parcels A and C) maintained as farmland, despite an explicit request from White Pond Associates and WPAC that the area not be farmed. It was noted that at the Special Town Meeting during which the Town approved the gift, White Pond Associates stated that according to their gift proposal the land was not to be farmed.

WPAC discussed why, given the relatively small watershed associated with White Pond, having the land farmed with the associated application of fertilizers on the farm fields, seemed inappropriate. Carmen offered to contact Bob Andrews of the ConcordCAN and the Pollinator Committee regarding this matter.

Meeting was adjourned at 8:58
