Would you choose an electric car if you could charge it on-site overnight where you live? CMLP can help!

If you live in a multi-unit dwelling that has five or more living units...

.....your complex could be one of three that CMLP selects to benefit from its EV Ready Pilot Program.
The program offers:

• Engineering services for the design of EV charging infrastructure;
• Financial assistance from CMLP to help defray installation costs;
• Streamlined metering and billing for EV charging; and
• Electric rate incentives for charging EVs off-peak.

Find out how your condo association or apartment building can take advantage of CMLP’s EV Ready Pilot Program

---
