

Concord Drives Electric

Join Over 300 Concord Residents Who Drive Electric!

Take advantage of financial incentives and free 1 on 1 coaching to join the fast-growing ranks of Concord residents who lower their carbon emissions and save money by driving electric vehicles. Learn why they love driving electric at concorddriveselectric.org.

**Massachusetts EV rebates up to \$1,500
available through Sept. 30, 2019 only!**

Fifteen popular full-battery electric vehicle models are eligible when you buy or lease before September 30th. <https://mor-ev.org/eligible-vehicles>

Dealer and manufacturer incentives can provide over \$15,000 off MSRP

Concord Drives Electric will connect you with dealer and/or manufacturer incentive programs specifically for electric vehicles. In some cases, combined incentives can provide over \$15,000 off MSRP! These additional incentives are available instantly at the dealership, and can lower monthly payment costs even further, sometimes to under \$200 a month and with no money down.

One of the most popular local EV discount programs is Drive Green brought to you by Green Energy Consumer Alliance. To learn more about how to take advantage of each of these discounts, incentives and special offers, contact Concord Drives Electric EV Specialist Support at ev@ene.org or 833-443-8363.

Don't forget to read up on the Level 2 charger and Off-Peak Charging incentives offered by CMLP, which can save you even MORE after purchasing an EV!

Free 2-Day Extended EV Test Drive

EV interested Concord residents can now sign up to take a free 2-day extended test drive of a plug-in electric car from a New England EV champion auto dealer. Unlike the traditional short test drive at an auto dealership, an extended test drive of an EV gives you the first-hand experience of what it's like to use and "fuel" an EV from your home.

During your extended test drive you can charge the car overnight at home, commute to work and/or complete your regular daily errands, or even try out the use of one of Concord's public EV charging stations*. To learn about what brands and models are currently available for this program, what the requirements are, and to schedule your extended test drive date, contact Concord Drives Electric EV Specialist Support at ev@ene.org or call 833.443.8363.

*To use Concord's public EV charging stations, drivers should first sign up for a free Chargepoint account and install the Chargepoint mobile app.

Concord Residents Share Their Experience with EV Specialist Support

“ You provided a massively helpful free service—thank you! I especially appreciate your suggestions about available plug in electric car choices—I'm not much of a car person, so I need all the help I can get wading through the options. ”

-Bill Rogers

“ Knowing that you are on the scene helped us so much. Thank you for sharing your real-life charging experiences and your expertise about home charging options. Concord really is making progress! ”

-Meg Wickwire
