EV Ready Pilot Program for Multi-Dwelling Units Committed EV Purchaser Agreement for Residents

I, _____, residing at _____,
Name Street Address & Unit # (if applicable)

I understand that my multi-dwelling unit has applied to receive engineering design services for electric vehicle (EV) charging infrastructure through the Concord Municipal Light Plant's (CMLP's) EV Ready Pilot Program.

I understand that the percentage of households at my multi-dwelling unit who plan to purchase an EV, once charging infrastructure is installed on-site, may be used by CMLP as a criterion for selecting the multi-dwelling units that receive engineering design services through the EV Ready Pilot Program.

I agree that CMLP will charge me a refundable \$250 deposit on my electric bill if my multi-dwelling unit is selected to receive engineering design services through the EV Ready Pilot Program.

CMLP will refund the deposit to me in the form of a \$250 credit on my electric bill if:

- EV charging infrastructure is installed at my multi-dwelling unit, and
- I provide proof of EV ownership (car owner's name and address, car make, model, year and VIN) to CMLP within 6 months of infrastructure completion.

CMLP will also refund the deposit to me in the form of a \$250 credit on my electric bill under the following circumstances:

- EV charging infrastructure has not been installed at my multi-dwelling unit within 2 years of the completion of EV charging infrastructure designs by CMLP's engineering services.
- I close my electric account with CMLP before EV charging infrastructure is installed at my multi-dwelling unit.

(over)

CMLP will retain the \$250 deposit permanently if charging infrastructure is installed at my multi-dwelling unit within 2 years of the completion of EV charging infrastructure designs by CMLP's engineering services but I do not provide proof of EV ownership to CMLP within 6 months of infrastructure completion.
