Concord, MA 01742

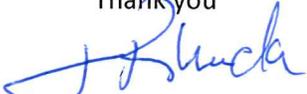

RE: Center & Main, 1450 Main Street, Concord

Dear Elizabeth,

I am writing to clarify my letter to the Planning Board regarding Energy Conservation. In paragraph 3 the letter states: *We feel that by building a certain number of homes with reduced energy consumption as a standard and modeling it accomplishes two goals.*

The word "standard" means some houses will be built on speculation with the energy conserving measures described in the letter. We committed to doing enough houses so that the average overall HERS rating of the project drops to at least 50.

Thank you

Jeffrey J. Rhuda
