Harvey Wheeler Community Center  
1276 Main Street

## Wayland

**Wednesday, March 4th**

**7:00PM – 9:00PM**

**presentation at 7:15PM**

Wayland Town Building, Large Hearing Room  
41 Cochituate Road

Advanced heat pumps are now a comfortable, cost-effective and environmentally friendly way to heat and cool many homes in New England. Come learn about air-source and ground-source heat pumps, and heat pump water heaters, especially if you:

- want to learn why heat pumps are greener than conventional heating systems
- don't have air conditioning but want it before summer temperatures arrive
- have an old heating system and want to know about replacement options for oil, propane, gas, or electric baseboards

Meet installers to learn which systems might work for your home. Talk with neighbors who have installed systems. Meet community heating/cooling coaches who can help you sort it all out. Find out about available financial incentives.
