

## **New public EV station charging electric rates**

<b>2 PM-7 PM Monday – Friday</b>	<b>\$3.00/ hr</b>	<b>\$3.33 eGal</b>
<b>All other hours</b>	<b>\$1.20/ hr</b>	<b>\$1.33 eGal</b>

Electric vehicles can lower system costs by improving the utilization of infrastructure or they can increase them by adding extra, regionally-assessed power expenses. The determining factor is the time of day a vehicle charges. That is why CMLP is implementing a Time-of-Use rate for its public EV charging stations.

From 2 PM to 7 PM on weekdays only, the cost to charge will be \$3.00 per hour (or portion thereof). During all other hours, including all day on weekends, the cost to charge will be \$1.20 per hour.
