SUBJECT: 1450 Main Street, Concord, Earth Removal Permit

Dear Ms. Hughes and Members of the Board:

We (***de maximis, inc.***) have been contracted as the General Contractor for the Nuclear Metals, Inc. Superfund Site (NMI) located at 2229 Main Street, in Concord, MA. As the General Contractor, we are responsible for the performing the remedial activities as required by the Consent Decree (CD) entered in December 2019 by the United States District Court for the District of Massachusetts Eastern Division in connection with Civil Action No. 19-12097-RGS. In 2015, the Town of Concord voted to acquire this 46-acre parcel upon completion of the remedial work.

One component of the work required under the CD is the removal and offsite disposal of approximately 85,000 cubic yards of impacted soils and sediments. Fill will be needed to replace most of the material that will be excavated and exported.

We believe a partial solution is to acquire the export material that is the subject of a permit application submitted by Symes Associates, Inc. By way of this letter, we are informing you we have executed a contract with Symes Associates, Inc. to acquire all of their export material or approximately 60,0000 cubic yards. We have performed soil investigation and chemical testing of the material to be excavated from 1442 Main Street and received approval from the EPA for use of this soil as backfill. Our engineer considers it to be suitable fill material for our project.

Use of this fill material will greatly reduce our import trucking activities, as the distance between the two sites is 1.5 miles. Our alternative is to find another borrow source, which would likely lead to us importing trailers of fill material from a much more distant location.

If you have any questions or concerns, please contact me at 860-662-0526 or at brucet@demaximis.com or Jessie McCusker at 860-817-7544 or jessie@demaximis.com

Sincerely,

Bruce Thompson
Project Coordinator
