

WOOD REPLACEMENT GUTTER

The Fiberglass Gutter Company manufactures and installs wood replacement fiberglass gutters for use in new home construction and historic renovations. We have reproduced the most commonly used and aesthetically pleasing gutter and moulding styles in the traditional fine home building business. Staying true to the classic wood gutter appearance while avoiding wood's considerable disadvantages.

Indistinguishable from wood, our gutters have received the approval of multiple Historical Commissions and have been enthusiastically received by architectural firms and quality builders throughout New England. Installations have ranged from 200+ year old colonials and antique reproduction capes, to new oceanfront contemporaries.

WHAT OUR CUSTOMERS ARE SAYING

Allen A. – Cambridge, MA

"Your guys did a terrific job on the house, and they were really great working with us to minimize any impact on our usual household schedule despite using the driveway as a work space (the crew was delighted to have such a big area to spread out their saws and tools!). And our three-year-old misses your crew, he enjoyed watching them work and interacting with them, mostly through the windows while they were on ladders nearby!"

Cathy D. – Belmont, MA

"We really appreciated your detailed description of the extensive work that needed to be done above and beyond the written estimate. All of this work was obviously necessary and isn't really unanticipated when you own an 1850's house. Your whole crew should be proud of the fine work they did in helping to restore this nice old farmhouse."

Lee S – E. Greenwich, RI

"My landscape architect told me to look into fiberglass gutters. I learned more when The Fiberglass Gutter Company was featured on This Old House. I too have a historical Italianate (built circa 1860). Gutters look 100% authentic and in contrast to wood shutters, I never have to worry about rot or painting. Could not be more pleased. So happy I took the time and chose The Fiberglass Gutter Company. Gutters look absolutely amazing."

Benjamin J. – Hingham, MA

"The Fiberglass Gutter Company came through and did an amazing job for us. There is no better product out there that resembles a wood gutter than their product. They are the best of the best, can't recommend them enough."
