## **Concord Light Seeks Resident Feedback on LED Street Light Pilot**

Concord, MA—The Concord Municipal Light Plant (CMLP) has installed LED street lights on two streets in Town as part of a pilot program. As the community ventures into the world of LED street lighting, CMLP has created a survey to solicit feedback from the community about what options they like best.

The Light Plant has narrowed the field of seemingly countless LED lighting manufacturers to the three best contenders. Two of each type has been installed in two neighborhoods on both Stow Street and Central Street. Both are identical, so it is only necessary to visit one pilot area to view the lighting.

Please visit <http://www.concordma.gov/StreetLightSurvey> to access the maps and survey. If you have any questions, please contact the Concord Municipal Light Plant. Responses will be accepted until September.

Concord Light looks forward to gaining this important feedback from the community.
