Concord Light Seeks Second Round of Resident Feedback on LED Street Light Pilot

Concord, MA—The Concord Municipal Light Plant (CMLP) installed LED street lights earlier this year on two streets (Central Street and Stow Street) in Town as part of a pilot program. As the community ventures into the world of LED street lighting, CMLP created a survey to solicit feedback. Upon reviewing the survey results, and considering industry feedback, CMLP has narrowed the field of lighting manufacturers to Cree. A second survey has been created to solicit additional feedback on the pilot from the community.

The pilot will continue to be conducted in the same two neighborhoods; however the new fixtures will exhibit two different color temperatures for side-by-side comparison. Both locations are identical, so it is only necessary to visit one pilot area to view the lighting.

Please visit www.concordma.gov/StreetLightSurvey to access the maps and survey. If you have any questions, please contact the Concord Municipal Light Plant. Responses will be accepted until February.

Concord Light looks forward to gaining this important feedback from the community.
